

I think it is a Republican-laced insult that the broadcast industry is exempt from the no-call registry regulations. Somebody with \$\$\$\$ clout has undermined the intent of the public furor and taken us for idiots and I am protesting this insult. I hope you get ALL of the phonecalls at YOUR homes and offices that are going to result from these stupid exceptions and I hope it is during your mealtimes and during other important times when your telephone lines are open for legitimate purposes. AND I hope that you clean up this little 'exception' out of respect for the public, late-gained though it will be.
